

Adam & Eve & EVOLUTION

A 5-week survey of the spectrum of Christian perspectives
on scientific findings and interpreting Genesis 1-3

Topics covered in this course will include...

History

An examination of the notion that
science and Christianity have
historically been "at war"

An examination of the emergence of the
Creationist movement in 20th Century
America

Science

A consideration of the scientific
definition of a "theory"

An explanation (in laymen's terms) of
the most recent scientific findings
pertaining to the origins of the universe,
life, species, & humans

An examination of six models (four of
them Christian) for interpreting the
scientific findings on origins

MARCH 8 - APRIL 8

Choose:

Wednesdays at 6:30 pm
or Saturdays at 9:30 am

Open to the Public

No Cost

Childcare Available

Scripture

A comparison of 4 different Biblical interpretations of Genesis 1-3, which each maintain an emphasis on the authority of Scripture

Theology

A consideration of how the Doctrines of the Fall and Original Sin
might be re-imagined in light of evolution

A discussion of why all of this matters, including how the
prevalent secular perception that Christianity is irreconcilable with
science could be impacting the success of the Great Commission
